CAREER SUMMARY

Full-stack developer with 2+ years of experience designing and optimizing high-performance web systems for complex industrial environments (Angular, .NET Core). Recently completed a Master's degree, including Syntx, a self-hosted AI-assisted development platform (Angular, FastAPI, Ollama, PostgreSQL/pgvector) — hands-on experience integrating LLMs, RAG pipelines, and multi-model evaluation into production-grade architecture.

SKILLS

- **Programming Languages** — TypeScript, JavaScript, C#, Python
- **Frontend Development** — Angular 21, RxJS, NgRx, Tailwind CSS, HTML5/CSS3
- **Backend Development** — .NET Core 8, ASP.NET Core Web API, FastAPI
- **AI / LLM Integration** — Ollama, LLM-based tooling, Retrieval-Augmented Generation (RAG), multi-model evaluation
- **Database** — SQL Server, PostgreSQL, pgvector
- **Tools & Infrastructure** — Git, Docker
- **Methodologies** — Agile/Scrum, Clean Architecture

WORK EXPERIENCE

Full Stack Developer, Trident SM 10/2025 – 12/2025 | Bucharest

- Architected and began implementation of the front-end structure, prioritizing code stability, scalability, and a solid foundation for future features; engaged with stakeholders in project kick-off meetings to analyze the current application flow and define requirements for the next version, focusing on user experience and process optimization.

Liberty Galați

Full Stack Developer 12/2023 – 09/2025

- **Technical Assistance Scheduler App:** Led development of an internal IT team availability tracker used during holiday periods; guided junior devs on reactive forms and Angular best practices; implemented dynamic forms for admins to create date ranges; developed calendar UI for users to submit daily availability; designed API endpoints with role-based access.
- **Manufacturing Execution System (MES) Optimization:** Reduced API response times by 25% through efficient EF Core queries with .AsNoTracking() and proper indexing; improved Angular code quality by introducing standalone components and modular architecture.
- **Internal Task Management Platform:** Replaced legacy service-based architecture with NgRx state management, improving task transition speed by 30%; optimized performance via selectors and reduced re-renders by 40% through OnPush change detection.

Web Developer Trainee 07/2022 – 09/2022

Technical Drawings Management System: Built a secure document management application for 100+ steel plant warehouse technicians; reduced drawing retrieval time by 65% through .NET Core API caching and optimized SQL Server queries with proper indexing.

PROJECTS

Syntx — Self-Hosted AI-Assisted Development Platform 🌐, *Master's Thesis* 2026

- Designed and built a self-hosted AI coding assistant (Angular 21, Tailwind CSS, Monaco Editor, FastAPI, Ollama) as a privacy-preserving alternative to cloud tools like GitHub Copilot.
- Implemented simultaneous multi-model comparison (up to 4 LLMs) with automated LLM-as-a judge ranking.
- Built a Retrieval-Augmented Generation (RAG) pipeline over the codebase using PostgreSQL + pgvector, with verifiable file-and-line citations in every response.
- Implemented role-based security architecture (developer/admin separation enforced at schema and API level), JWT authentication, and GDPR-compliant consent flows.

- Ran a comparative case study across 4 LLMs (2 local via Ollama, 2 cloud via Groq) on 15 coding problems, evaluating correctness, latency, and judge-score consistency.
- Team Management System,** *Bachelor's Degree Project* 2023
- Built interactive dashboards with dynamic task boards (drag-and-drop using React Beautiful DND), responsive design.
 - Designed a RESTful API using JWT authentication.
 - Optimized queries through indexed fields (teamId, deadline) for 50% faster searches.

EDUCATION

Master of Advanced Computer Science – Software Engineering 10/2024 – 07/2026
"Dunărea de Jos" University of Galați
Thesis: "Automated Assistance in Software Development through AI-Based Source Code Generation"

Bachelor of Computer Science – Software Engineering 10/2019 – 07/2023
"Dunărea de Jos" University of Galați
